To whom it may concern:

I would like to express my sincere appreciation for and satisfaction with the services provided and expertise shared by Mr. Daniel Freeman of Envirotex Environmental Services at my residence.

I have experienced what I believed was a leak or crack in the foundation of my home, potentially resulting to moisture build-up and mold creation in my basement.

I have reached out to Mr. Freeman for assistance, as I have done once before some time ago due to another problem that I was having in my home. Mr. Freeman was extremely responsive and receptive to listening to my problem, and he was willing to visit and inspect my home.

He was extremely flexible with the scheduling of a site visit. He promptly arrived at the scheduled time. He inspected my home, discussed with me the issues I believed I was experiencing and observing, and he offered me valuable and helpful tips for dealing with the issues facing my home. Ultimately, I was able to avoid any serious damage or defects, and Mr. Freeman's honest and professional advise saved me much money and headaches in unnecessary expenses and not needed repair or replacement projects.

Mr. Freeman is very knowledgeable and honest, and I would definitely trust him to deal with any pertinent home issues I may have in the future. I wholeheartedly recommend him to undertake and complete any projects within the scope and expertise of his business.

Sincerely,

Artur K
